

JORGE ARCE SOLANO

FULL STACK SOFTWARE ENGINEER | SAAS DEVELOPMENT | FUNCTIONAL QA

Curridabat, San José, Costa Rica | +506 8328-7094 | jarce-s03@hotmail.com
linkedin.com/in/jorge-arce-solano | github.com/Jarce003 | firetrackcr.com

PROFESSIONAL SUMMARY

Systems Engineer and Full Stack Software Engineer with hands-on experience designing, building, testing and deploying production web applications. Principal developer of FireTrack, a multi-tenant SaaS platform, and EvacuaPlan Studio, an interactive emergency-plan editor. Strong in requirements analysis, secure data access, business workflows, functional QA, technical communication and end-to-end product ownership. Native Spanish and English C1.

CORE SKILLS

Frontend: Next.js, React, TypeScript, JavaScript, Tailwind CSS, HTML5, CSS3, responsive interfaces
Backend & Data: Node.js, REST APIs, PostgreSQL, Supabase, SQL, authentication, RBAC and Row Level Security
Quality & Delivery: Functional, exploratory and regression testing, debugging, Git/GitHub, Vercel, build validation
Additional: C#, .NET Framework, Java, Python, Moodle, requirements analysis, project coordination, AI-assisted development

EDUCATION

Bachelor's Degree in Systems Engineering | Universidad Autónoma de Centro América (UACA) | 2024
Summa Cum Laude Probatus distinction

LANGUAGES

Spanish: Native
English: C1 Advanced

AI-ASSISTED WORKFLOW

Uses AI tools for analysis, implementation planning, debugging, refactoring, testing and documentation while personally reviewing, validating and testing all production changes.

AVAILABILITY

Remote, contract and freelance opportunities
Based in Costa Rica
Portfolio and references available

PROFESSIONAL STRENGTHS

- Requirements discovery
- Business-oriented problem solving
- Clear stakeholder communication
- Ownership from concept to production

SELECTED PRODUCT EXPERIENCE

FireTrack - Multi-Tenant Fire Safety SaaS

Principal Developer | 2025 - Present | Next.js, TypeScript, Supabase, PostgreSQL, Vercel

- Architected and deployed a multi-company platform for inventory, inspections, maintenance, users, roles, alerts, audit records, QR access, PDF reports, email and Excel imports.
- Implemented authentication, company-scoped permissions, server-side validation and PostgreSQL RLS for secure tenant isolation.
- Owned requirements, architecture, frontend, backend, testing, deployment and ongoing maintenance.

EvacuaPlan Studio - Interactive Emergency-Plan Editor

Principal Developer | 2026 - Present | Next.js, React, TypeScript, Konva

- Built a browser-based graphical editor with drawing tools, object transformation, multi-selection, undo/redo and PDF-oriented workflows.
- Validated responsive desktop and iPad interactions, including mouse, touch, pinch-zoom, two-finger pan and Apple Pencil.

PROFESSIONAL EXPERIENCE

Full Stack Software Engineer

Independent Software Development | 2025 - Present

- Designs and develops business web applications and SaaS products from requirements through deployment.
- Builds secure interfaces, APIs, database workflows, authentication, roles, reporting and operational tools.

Firefighter & Emergency Response Professional

Benemérito Cuerpo de Bomberos de Costa Rica | 2014 - Present

- Works in high-responsibility environments requiring risk assessment, teamwork, communication and disciplined execution.
- Applies operational judgment, structured procedures and calm decision-making in time-critical situations.

Fire Instructor & E-Learning Project Coordinator

Academia Nacional de Bomberos | Jan 2022 - Jan 2025

- Led Moodle course-virtualization workflows, coordinated contributors, clarified requirements and supported technical training.
- Translated training needs into repeatable digital workflows and clear implementation plans.
